

## SMART AirLiner Tips and Tricks

### Setting Up Your Airliner for Use

In order for your device to work, the Bluetooth dongle must be plugged in to your computer.

You will then see the Bluetooth Icon appear in your system tray.

On the Airliner, click the power button in the upper left corner and the black "connect" button on the back of the airliner. The Airliner power button should begin to blink.

RIGHT Click on the Bluetooth Icon and select "Show Bluetooth Devices."

Click on the "SMART Wireless Slate" Icon and then click "Add." If the icon for SMART Wireless Slate does not appear, go ahead and click Add anyway.

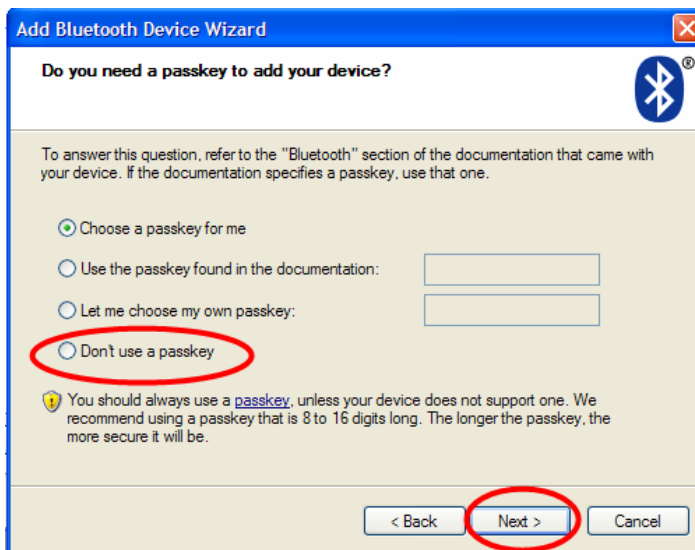

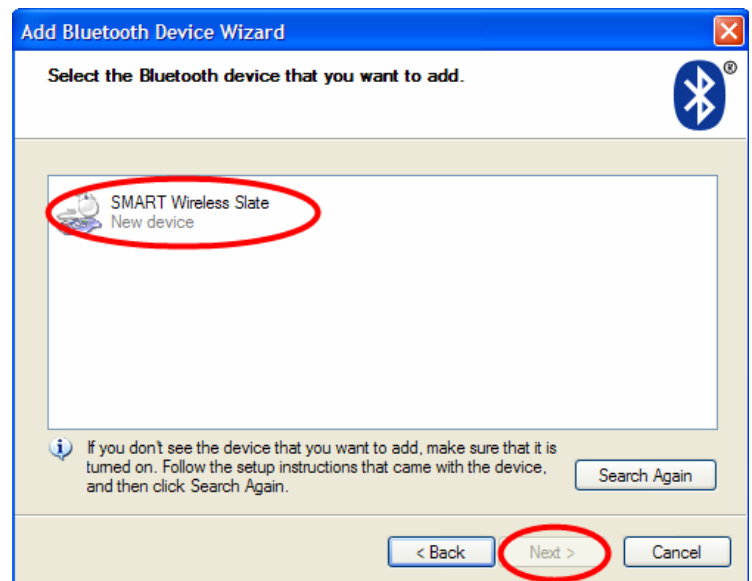

The Bluetooth Device Wizard will appear. Check the box next to "My device is set up and ready to be found." And then click "Next."

Click on the "SMART Wireless Slate" Icon and click "Next."

Click "Don't use a passkey" and then click "Next."

Click "Finish". Now you are ready to use your SMART AirLiner!!

### **Charging the battery**

Follow the advice below to conserve battery charge and ensure that the slate is always ready for use.

- Turn off the slate when you finish working with it.
- Recharge the battery if you don't expect to use the slate for a number of days.  
NOTE: The slate still draws a small amount of current from the battery even when the slate is turned off.  
When you recharge the battery, you ensure that the battery still has some charge when you next use it. There is a built-in protection circuit that prevents the battery from overcharging.  
CAUTION: **If the battery loses all of its charge, you can't recharge it.**
- If you won't be using your slate for an extended period of time (a month or longer), unplug charge it fully and then the battery from the slate.
- When the battery's charge falls below 20%, an alert in the system tray reminds you to recharge the battery. When this happens, connect the slate to an external power source using the power adapter cable. You can continue to use the slate while the battery is recharging.

### **Cleaning the Slate**

Regularly clean your AirLiner WS100 wireless slate with a soft, damp cloth to remove dust and dirt particles. If necessary, dampen the cloth using very mild soap that is diluted with water.

### **Register Your AirLiner**

It is important that you register your AirLiner so you can receive technical support. Go to [www.smarttech.com/registration](http://www.smarttech.com/registration)

All SMART products include free support.

Telephone: 1.866.518.6791 (toll-free)

(Available 8 a.m. - 7 p.m. from Monday to Friday)
